Seal	Jul	Akunnaaq	30			Riffle		X			The stock has increased. The seals are fat and have good fur.	Good feeding options. To the east of Nivaaq, there is plenty of Capelin.	We wish for fur selling options in Akunnaaq. Since we cannot sell we only catch seals for our own consumption

Artlantic Cod	Jul	Akunnaaq	30			net			X		Small cods this year. The cod first arrived in August.	This summer the weather and the water were cold, possibly the reason why the cod did not come close to the coast.	No new proposal
	Aug	Akunnaaq	30						X				
	Sep	Akunnaaq	30						X				
Humpback Whale	Jul	Akunnaaq	30						X		Very few observations	The whales follow their food	No new proposal
	Aug	Akunnaaq	30						X				
	Sep	Akunnaaq	30						X				
Harbour Porpoise	Jul	Akunnaaq	30			Riffle		X			The stock is large. The size of the animals has not changed.	Numbers as in the old time, last seen in the 1980'ies Feeding options are apparently good.	No new proposal
	Aug	Akunnaaq	30					X					
	Sep	Akunnaaq	30					X					
Wolffish sp.	Jul	Akunnaaq	30			Long Lline		X			The stock has increased and the fish are larger.	The increasing stock reflect that few are caught as they can not be sold in Akunnaaq.	We wish for selling options in Akunnaaq.
	Aug	Akunnaaq	30					X					
	Sep	Akunnaaq	30					X					
Arctic Tern		Akunnaaq	30								Very few observed and no breeding recorded.	Terns did arrive at Niaqornat and Saattuarsunnguit (Grønne Ejland). Their presence very short. Foxes have been observed in Niaqornat.
