Coordinator's name			Per Ole Frederiksen				Year, quarter				4Q 2020		
Community (bygd)			Attu				Trend						
Species/impact	Month	Location	Total number of trips	Total number seen	Total catch	Mathod	No changes	Increasing	Decreasing	Don't know	Comments about number seen, size, first/last oberved, etc.	Significance and possible explanations of the trend	Recommendations for the management (perhaps explain on the seperate sheet
Atlantic Cod	10	Attu	75		3,7	Bottom gillnet			X		The size of stock and body size are decreasing	It seems that the condition of the sea has changed significantly. Although the cods appear to have plenty of food.	No new recommendation
	11	Attu	100		3,65	Bottom gillnet			X				
	12	Attu	60		1,2	Bottom gillnet			X				
Seal	10	Attu	75	120	15	Rifle/gill net			X		Size of stock is decreasing. Body size unchanged. Both individuals with and without much fat were recorded.	It seems that the condition of the sea has changed significantly. Although the seals appear to have plenty of food.	No new recommendation
	11	Attu	100	425	14	Rifle/gill net			X				
	12	Attu	60	250	5	Rifle/gill net			X				
Thick-billed Murre	10	Attu	75	0	0	Shotgun			X		The population is decreasing. The guillemots are fat. The stomach content is small squid.	The western ice was far out, therefore the guillemot did not come close to the shore.	The already proposed amendment of the hunting period is still relevant
	11	Attu	100	220	50	Shotgun			X				
	12	Attu	60	960	40	Shotgun			X				
Caribou	10	Attu	75	550	26	Riffle	X				The animals are fat, the stock size is unchanged.	The snow arrived very late. This has resulted in fat animals still in good condition in December.	It is proposed to close for hunting of reindeer in December and open for spring hunting in March.
	11	Attu	100	500	10	Riffle	X						
	12	Attu	60	115	8	Riffle	X						
Sea-ice	10	Attu	75								The western ice was not observed until the autumn.	The weather has probably changed permanently. Warmer ocean current appears. No icebergs were observed by the Attu people this fall.	
	11	Attu	100										
	12	Attu	60										
Minke Whale	10	Attu	75	80	5	Riffle		X			Out west, the population is larger, the whales are fat, the size unchanged.	Looks like the whales have plenty of food.	It is proposed that the season for vessels with harpoon cannon is opened earlier in the autumn. Opening is proposed for 15 September.
	11	Attu	100	0	0					X			
	12	Attu	60	0	0					X
